

CTM 20/20 Prefab Wall Bearing Panel

The CTM 20/20 panel is a prefabricated, light weight, insulated wall bearing panel for office buildings. The CTM panel is 10 feet in width and 15 feet in height and is framed of 6 inch "C/O Trusses." Fiberglass insulation batts nest between the "C/O Trusses." Electrical conduits for power, telephone and other communications are also incorporated within the panel. The panel is framed at the point of manufacture with precise openings to accommodate architecturally designed fenestration. Sheathing of various types can be used to face the panel sides prior to finishing the interior and exterior.
