

**Cordless Power Nailer – Impulse 325**

The ITW Paslode Impulse 325 is an airless, cordless nailer which operates without hoses, compressors, or electrical cords. It drives nails from two to three and a quarter inches in length. The fuel is LP gas contained in an aerosol disposable canister, and the ignition spark is provided by a rechargeable battery. The nailer is for use in framing, rafters, roofing, stairs, headers, siding, decks, and other similar uses. Its use should increase worker productivity.
