

E-Z Ancor for Drywall Anchors

E-Z Ancor is a self-drilling, one-piece, anchor for mounting fixtures to drywall. There is no need to pre-drill a hole in the drywall. E-Z Ancor is driven into the wall with a #2 Phillips Screwdriver. After the fixture is in place, a #8 diameter sheet metal screw is used to secure the attachment. E-Z Ancor replaces plastic plugs, Molly bolts or toggle bolts.
