

Partners in Construction Cooperation with Unions, Contractors, and Clients

Partners in Construction Cooperation (PICC) is a non-profit construction industry committee of unions, union contractors, and clients in Oregon and Southwest Washington, established in 1987. It is designed to improve quality of work and work life and to support health and safety programs. PICC designs a custom made communication program for each construction project in cooperation with client, contractor, and labor unions, and serves as an on-going consultant. PICC trains facilitators from the contractor and labor groups at the job site to carry the process through to the project's end. PICC programs involve every individual at the project site.
