

Destruction and Vitrification of Asbestos Contaminated Material Using Plasma Arc Technology

The Detroit Works Partnership (DWP) is an affiliate of the American Works Partnership in Washington, DC. The mission of DWP is to produce the greatest number of construction training and job opportunities for the residents, primarily low-income, of the City of Detroit. To achieve this mission, DWP provides technical assistance to contractors and to City government: to reduce obstacles to responsible development in the City; to enhance the financial viability of minority and women-owned businesses; to assist with residency and minority hiring goals while reducing the paperwork and productivity burden put on participating contractors; to assist community-based organizations in reaching out to low-income residents and easing these persons into bona fide apprenticeship programs; to provide home ownership opportunities; to invest prudently pension funds in revitalizing the City; and to create consensus among diverse interest groups for the benefit of low-income residents and for the enhancement of the image of the construction industry.
