Protect-O-Gate Clear-Aisle Gate

The Protect-O-Gate Aisle Gate is a revolutionary breakthrough for reducing the potential for falls and other accidents associated with mezzanine loading areas while taking up only 10" of aisle space.

It replaces pivot gates that take up a lot of space.

It was invented in 2006 and has been used by companies that need to safely load/unload on mezzanines while taking up little aisle space.

Mezzanine Safety Gate Clear Aisle Model

MEETS OSHA
REQUIREMENTS

The Protect-O-Gate Clear Aisle is a revolutionary breakthrough for reducing the potential for falls and other accidents associated with mezzanine loading areas while taking up only 10" of aisle space.

MODEL PG-04-CA

- Provides access to the work area from three sides.
- Requires only 10" of space on the mezzanine ledge when "corral" is in the raised position
- Ergonomic, counterbalanced operation
- Maximum load dimensions: 80"H x 60"W x 60"D
- Durable, welded steel construction
- Shipped partially assembled for ease of installation
- Patent pending

When "corral" is lowered, ledge gates swing open. Worker is blocked from staging area.

When "corral" is raised, ledge gates swing closed. Worker has access to load. Fall potential is eliminated.
